Would this be in Rome or Bologna? Universities will either be in the midst of exams or out of session, so we'd have to think creatively about audiences and venues. Caron's point about English is very valid – we have excellent interpreters we can hire for simultaneous interpretation, but the cost would depend on the audiovisual and translation equipment needed, etc.

Hi Mark! I believe so. I'm adding Menaka in Public Affairs – they have strong school connections. Since he'd address the audience in English, that does narrow our options.

If the Administrator is willing to make a public speech, would you have a ready venue for him? (university, American center, etc?)

It would likely focus on environmental innovation.

Mark

Hi all!

Nancy already sent a bio to Lee and Kristin – no need for another! We look forward to yours, Walker, for *A Plastic Ocean*.

Mark, after we factored in the movie length, I think we'll just have Nancy and Walker briefly remark about their marine pollution projects and personal actions people can take. We'll be using your bio for the Administrator's trip.

Thanks!

Thanks [Ex. 6 - Personal Privacy] I am happy to make a few remarks as well.

Best,
Nancy

Sure Walker! Here is the cable that was supposed to go out. (Note, Secret clearance is not necessary, and I've just pointed this out to OES, the part of our bureaucracy that collects and distributes the Science Fellow call.)

I look forward to meeting you Walker and Nancy, and seeing my dear friend Mark, once again.

Cheers, [Ex. 6 - Personal Privacy]

Dear [Ex. 6 - Personal Privacy]

This looks to be a great event. Yes, I would be happy to make a few remarks (and to hear the remarks of my co-panelists!). Also, can you forward the science fellows cable? I don't think that I have seen it. I have a secret clearance but it is easier to deal with if it is unclassified.

Looking forward to seeing everyone in a few weeks,

Walker

Dear Mark, Walker, and Nancy,

Nancy, that is so fabulous that you were a panelist after the screening at Enviro film festival. The festival is one of my five things that I miss most about living in D.C. When we invited contacts for our screening, we had the DG of Fisheries and Dr. Cristina Fossi (that awesome Italian lady with the dart gun in the film who measures plastic in the blubber of Mediterranean cetaceans) speak.

Along those lines, I wonder if the three of you would be willing at the end to briefly introduce yourselves and say a few words about personal actions people can take. (no more than five minutes total) followed by an aperitivo to mingle for half an hour (I'd ask Green Team members to bring snacks and Prosecco). Would that work for you three? The whole event would be over by 6:45-ish and then you could go to dinner, or just crash at your hotel. (Although I must say my overcoming jet lag routine requires me to stay up until 10 p.m. no matter where I am in the world. This is most difficult with a 12-hour flip ☺.)

Also, please see our Science Fellows cable, which I hope you've seen as well. The one that went out erroneously said a Secret clearance was needed. We know that most other agencies just have "public trust." I've got to correct this with OES, because we identified unclassified space in our embassy.
